To direct input to this VM, click inside or press Ctrl+G.

U: 0.00 kbit/s D: 0.00 kbit/s EN 13:39

The screenshot shows the Proxmox VE 6.4-4 interface. The main window title is "calvina - Proxmox Virtual Environment". The left sidebar shows a "Datacenter" section with "calvina" selected, which has "local (calvina)" and "local-lvm (calvina)" listed. The central panel is titled "Storage 'local' on node 'calvina'". It has tabs for "Summary", "Backups", "ISO Images" (which is selected), "CT Templates", and "Permissions". There is an "Upload" button and a "Remove" button. A search bar at the top right allows filtering by Name, Date, Format, and Size. Below the tabs is a table with columns for Name, Date, Format, and Size. The bottom section shows a "Tasks" tab and a "Cluster log" table. The log table has columns for Start Time, End Time, Node, User name, Description, and Status. One entry is shown: "Jul 02 13:38:56 Jul 02 13:38:56 calvina root@pam Start all VMs and Containers OK". The bottom status bar shows network speeds (U: 0.00 kbit/s, D: 0.00 kbit/s) and the time (13:49).

This screenshot is nearly identical to the one above, showing the same Proxmox VE interface. However, a modal dialog box titled "Upload" is overlaid on the central panel. The dialog has a dropdown menu set to "ISO image", a file selection input field with a "Select File..." button, and two buttons at the bottom labeled "Abort" and "Upload". The rest of the interface, including the sidebar, storage summary, and tasks log, remains the same.

The screenshot shows the Proxmox VE 6.4-4 interface. In the center, there is a modal dialog titled "Upload" with the sub-section "ISO Images". The "Content" dropdown is set to "ISO image". Below it, a file selection input shows the path "C:\fakepath\Windows\_XP\_Pro.iso" and a "Select File..." button. At the bottom of the dialog are "Abort" and "Upload" buttons. The background shows the "Storage 'local' on node 'calvina'" section of the main interface, which includes tabs for "Summary", "Backups", and "ISO Images". The "ISO Images" tab is selected. On the left, a sidebar shows the "Datacenter" and "calvina" nodes, with "local (calvina)" selected. At the bottom, there is a "Tasks" section showing a single entry: "Jul 02 13:38:56 Jul 02 13:38:56 calvina root@pam Start all VMs and Containers OK". The system tray at the bottom right shows network speeds of 0.00 kbit/s for both uplink and downlink.

This screenshot is nearly identical to the one above, but the "Upload" dialog now displays a progress bar indicating "16.36% (101.06 MiB)" has been uploaded. The rest of the interface, including the storage management section and the task log, remains the same. The system tray at the bottom right still shows 0.00 kbit/s for both U and D.

The screenshot shows the Proxmox VE 6.4-4 interface. In the main window, under 'Storage local' on node 'calvina', there is a table for ISO Images. One entry is visible: 'Windows\_XP\_Pro\_SP3\_JawaraFile.iso' (Date: 2021-07-02 14:04:16, Format: iso, Size: 346.30 MiB). Below this, the 'Cluster log' section displays several entries from the task log:

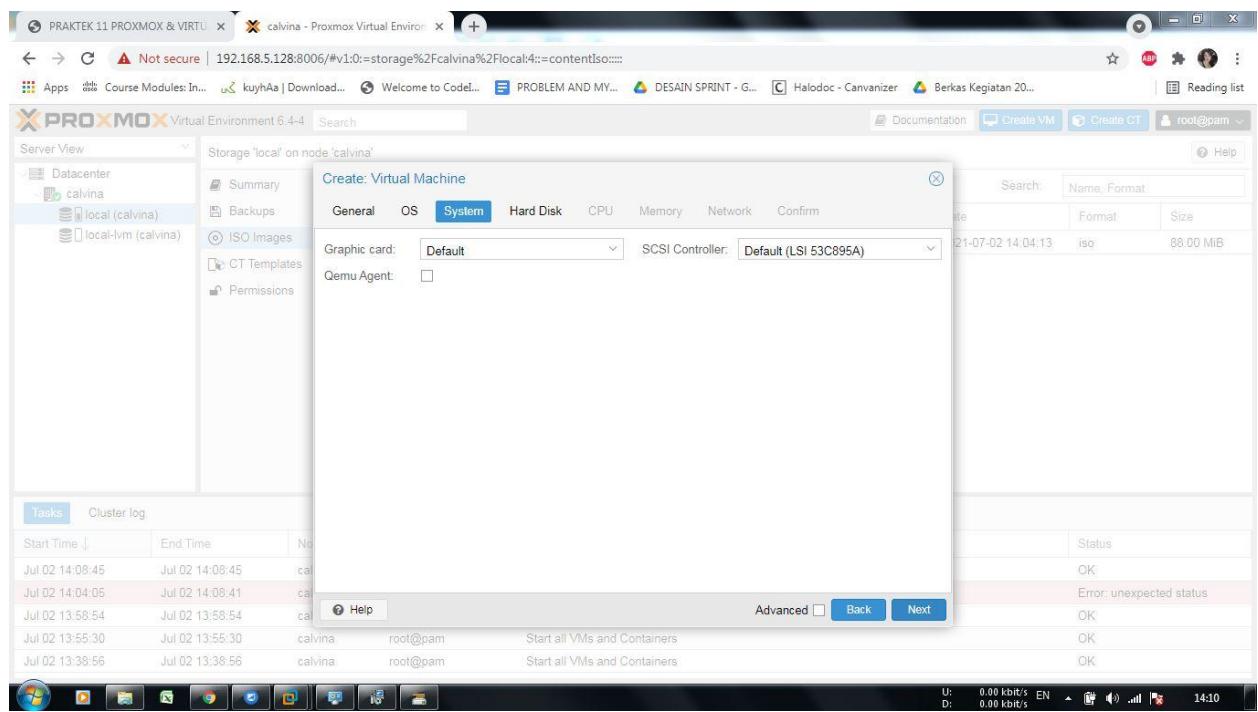

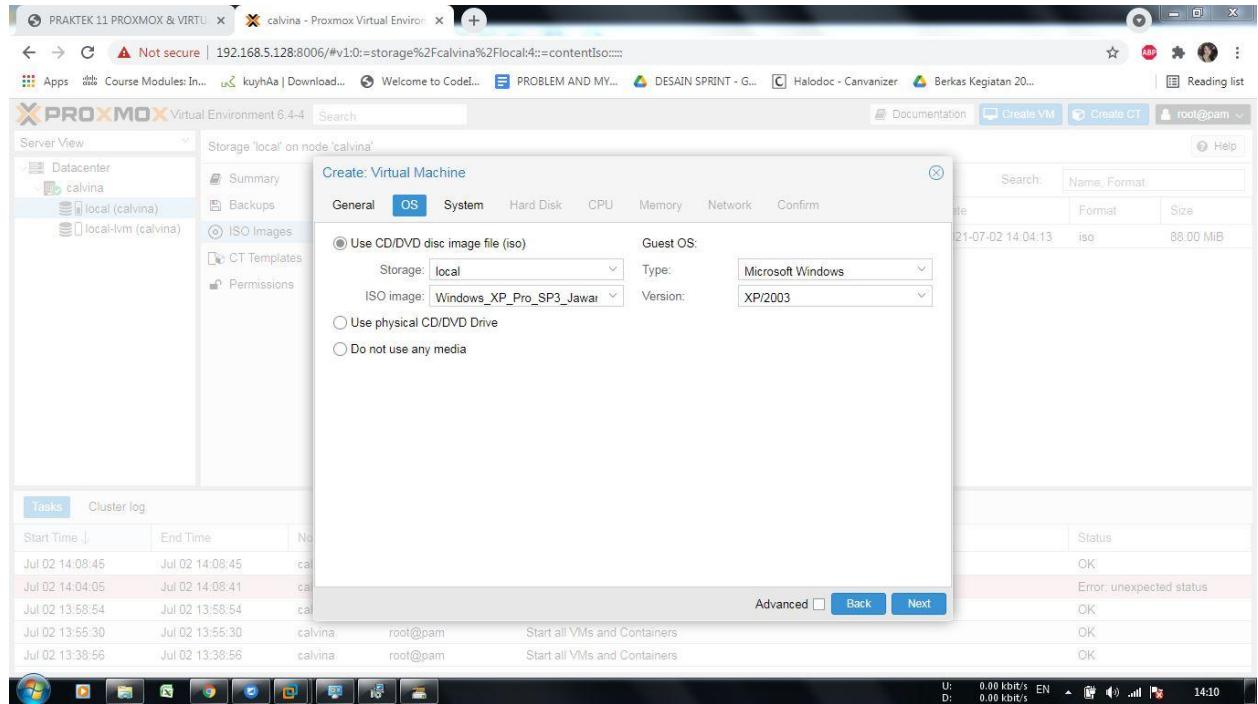

Start Time	End Time	Node	User name	Description	Status
Jul 02 14:04:05		calvina	root@pam	Copy data	OK
Jul 02 13:58:54	Jul 02 13:58:54	calvina	root@pam	Start all VMs and Containers	OK
Jul 02 13:55:30	Jul 02 13:55:30	calvina	root@pam	Start all VMs and Containers	OK
Jul 02 13:38:56	Jul 02 13:38:56	calvina	root@pam	Start all VMs and Containers	OK

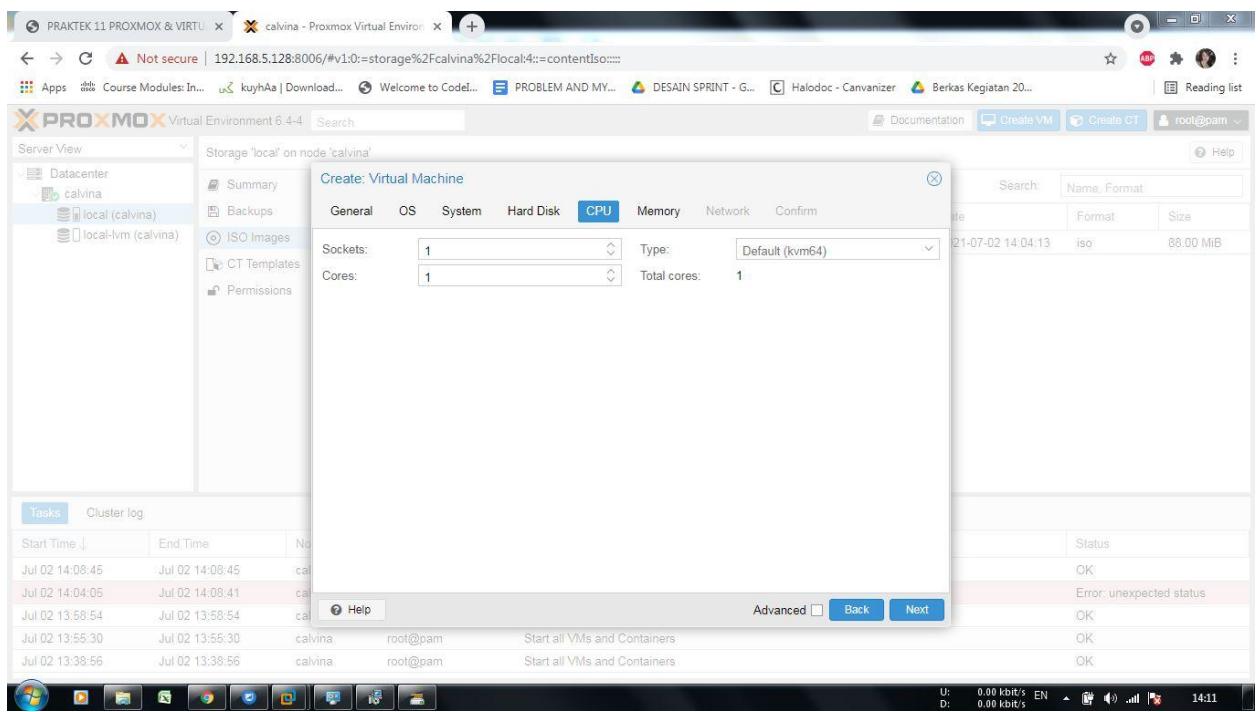

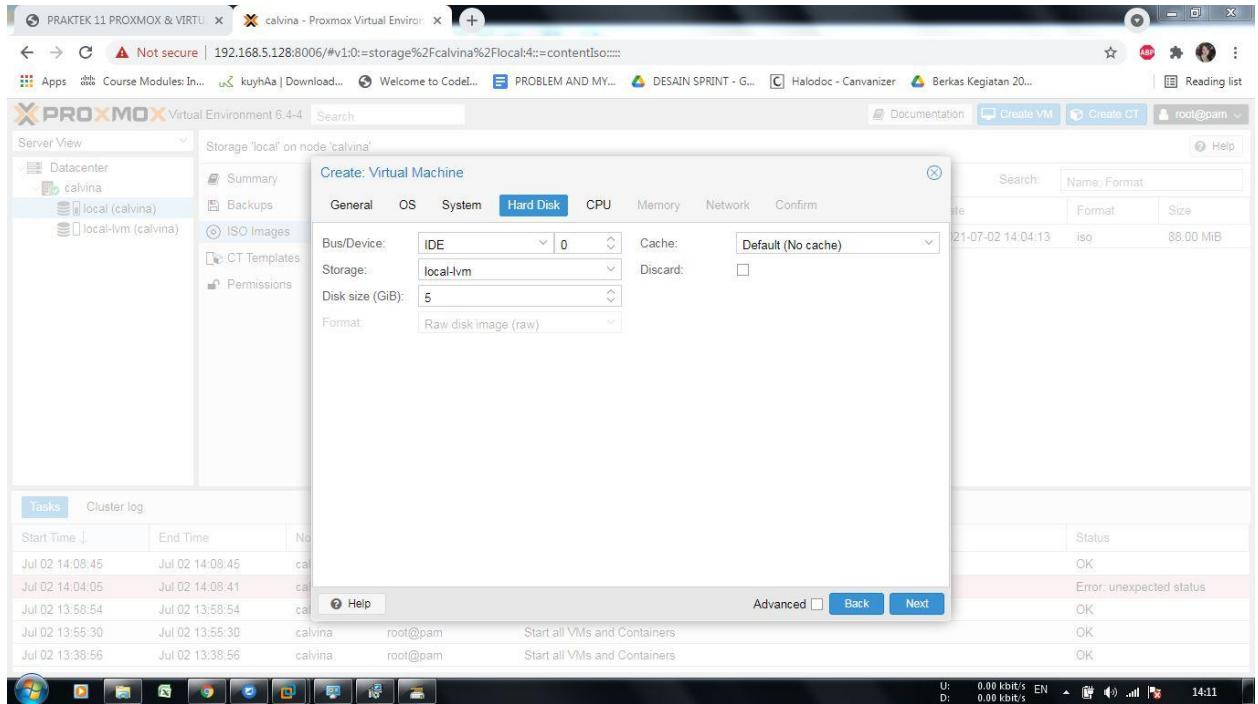

## CREATE VM PROMOX DAN INSTALASI OS

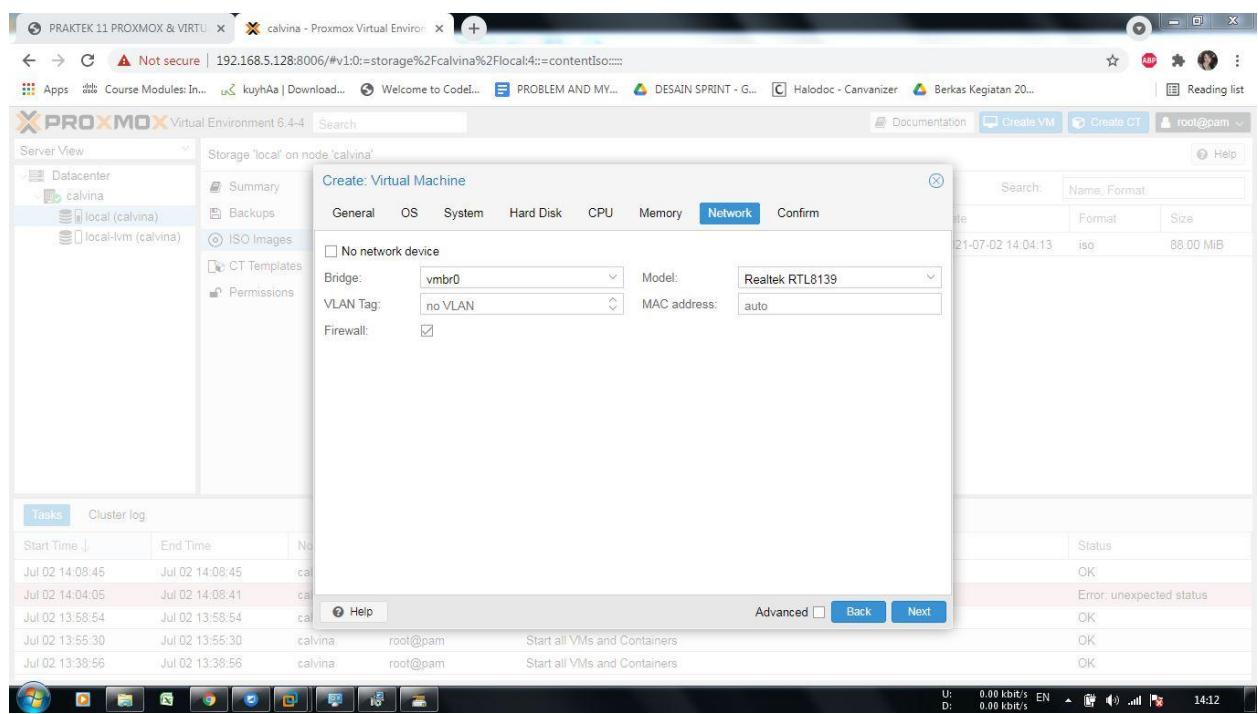

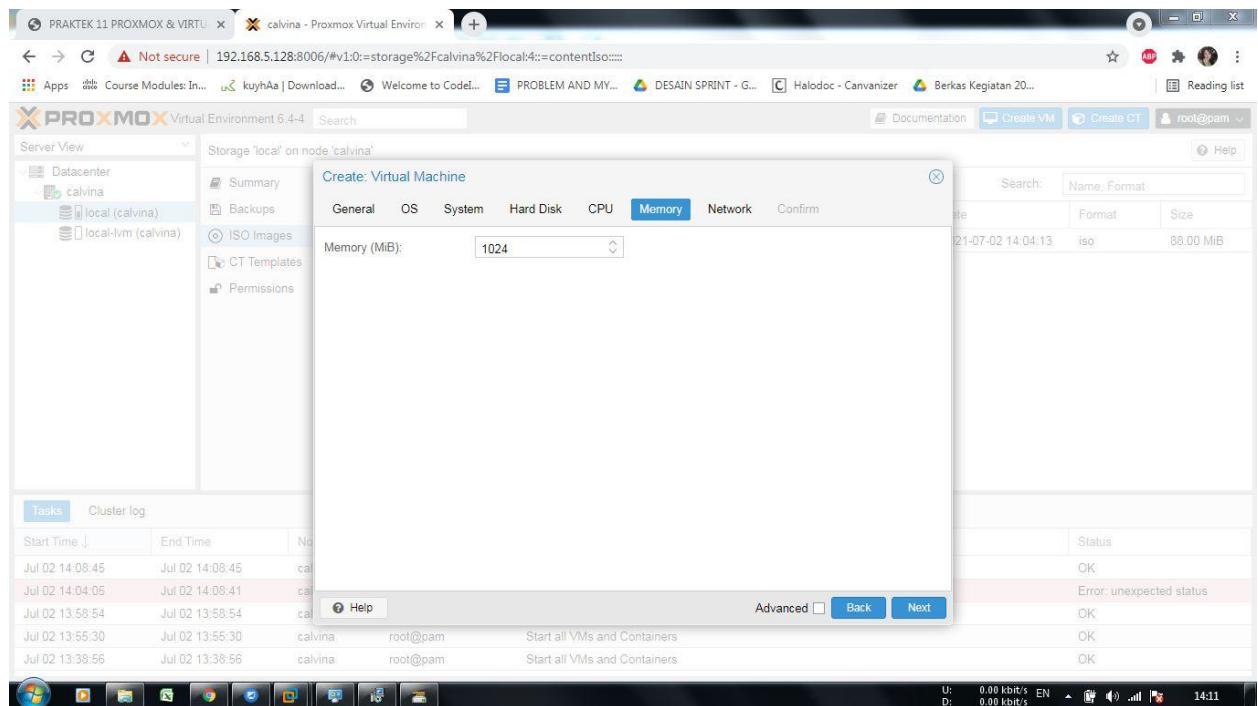

The screenshot shows the 'Create: Virtual Machine' dialog box in the Proxmox VE interface. The 'General' tab is selected. The configuration includes:

- Node: calvina
- VM ID: 100
- Name: calvina.xp

The 'OS' tab is also visible, showing options for the operating system. The background shows the same storage and cluster log interface as the previous screenshot.
